

**Suzanne Hargreaves** has completed this personal reflection on **24/11/2021**

**Paper:** Autumn 2021 CPD Questions

**Personal Reflection:**

This quarters questions were topical and very relevant as they related to Covid-19. The papers looked at the occurrence of arterial thrombosis and PE/DVT. The papers looked at the incidence of the conditions either in their Trust or combining papers to form a meta analysis. The papers confirmed what we ourselves have found here and the incidence of thrombotic events increases with Covid-19. It was particularly interesting that in the case of arterial thrombosis the patients didn't necessarily have any symptoms to indicate an occlusive/significant event. It was very interesting to read and now that papers are being published I will look for other papers that have or will be published.
