Paper: Summer 2020 CPD Questions

Personal Reflection:

Description of the learning

In paper 1 I read about the characteristics and clinical presentation in patients with isolated pulmonary embolism compared to patients with pulmonary embolism plus DVT. This was an interesting study to read from the point of view that patients can present with isolated PE and also the associated clinical co-morbidities which can present with isolated PE and DVT.

In paper 2 I read about the different management options for primary varicose veins in females and the associated 3-year follow up.

Evaluation

I read through each paper once, then read through the questions about each paper. Then, I read through the papers again and highlighted the key points.

Analysis

I referred directly to the statistical analysis results within each paper.

Conclusion

I enjoyed doing these paper reviews and found it really useful for developing my skills in analysing information.

Action Plan

What I have learned in these paper reviews will help my own practice.
