

Clinical Audit

★★★★★ 8 Reviews

Clinical audit means examining a part of clinical practice, comparing it against an objective standard, and acting to make changes in practice to reach the chosen standard if necessary. All this is done with the aim of improving patient care. This eLearning programme was written and quality assured by a team of experienced practitioners and clinicians. It aims to give the learner a complete overview of the Clinical Auditing process. Through this programme, you will gain an introduction to clinical audit, learn about planning and measuring performance, and hear how to manage and implement practical steps to change after audit.

Learning Type: Online

Available Languages: • English

Session(s):  Clinical Audit
