Hi all

A reminder about the training forum on Wednesday - this will follow the same format as last week.

Jack will lead the morning session on AAAs/arterials, then Vikki will take the afternoon session on controls and how to take a good image. We will start each session with the theory, then will go back to the VSU for a scanning session.

9am-11am: AAA/Arterials theory (Wythenshawe ERC seminar room 5)

11am-12pm: AAA/arterials practical (Vascular studies scan room 2)

1pm-3pm: Controls theory (Wythenshawe ERC seminar room 5)

3pm-4pm: Controls practical (Vascular studies scan room 2)

Vikki will be coming across from Oldham for the afternoon session so don't panic if she's late.

Thanks
Hannah
