Dear Matt

Thank you for your excellent contribution to this course, in the autumn. The feedback has been overwhelmingly positive. I hope you found the experience enjoyable and rewarding.

The 1st year students enjoyed the lecture on vascular diseases.

A common theme from all three years is that they like being taught by STP alumni as they know what is required in the workplace so the content matches appropriate learning outcomes. Another common theme is that they like the Canvas quizzes. Next year I will include yet more questions.

I will look at the structure again for the first year students, though my intention is to broadly keep the same format-i.e separate lectures on main areas of disease. Another approach is to focus on case studies.

All first year contributors are welcome to provide feedback on how we can improve this new version of the course. My plan is to retain your lecture, though of course you may not be able to give this as you are off doing other exciting things!

Thank you too for the hard work in helping with assessments in the summer.

I hope you have a good Christmas break

Kathia
