Hi Joao

Great. Looking forward to it. See you tomorrow.

Kind regards

Katy

Hi Katy

Looking forward to teaching you the wonders of 3D US tomorrow.
Just be here by 9am, don't rush yourself. Plan is to go through the 3D scanning with you
and then we have two CABG patients at 11am and 2pm to scan.

See tomorrow,

Joao Carreira

Hi Joao,

Thanks for you email. This sounds great and very exciting.

Thursdays are usually a better day staffing wise however the next few are looking a bit iffy. I'll have a proper look at the rota today with Lindsay and get back to you. I am on annual leave next Thursday (17th) but there is scope for me to cancel it and come then, if that would be a good day for you?

Kind regards

Katy Allen

Dear Katy

Hope this email finds you well. I just thought I would send you an email regarding the 3D vein map scans that Steve and I are planning to implement across IVS sites in the next months and what is our plan.

We have been working on a protocol that you can find on the share drive under Documents - Staff - Scanning Protocols that will be helpful for staff guidance. We also have a video that soon will be uploaded to Youtube, we hope!

In the meantime, we are planning for you to come to SM for one day so I could train you how to scan and analyse 3D vein maps and then to have a 3D station at BP for staff start to do 3D vein maps there.

I will check in the next couple of days our requests for vein maps and ask Lauren to appoint a couple to when you are here. If we plan for a Thursday in advance would be alright for you?

Regards,
