Benefits to your practice:	<p>This SVT workshop provided a huge amount of information regarding the assessment of EVAR and FEVAR devices, using Doppler and contrast imaging.</p> <p>We also gained hands on experience of looking at different devices and different types of endoleaks.</p>
Benefits to service user:	<p>I was able to examine this type of patient with more confidence when back in my own department. We perform contrast already and it was encouraging that our protocols are in line with other centres.</p>
