

Penelope Gill has completed this personal reflection on **23/10/2018**

Paper: Summer 2018 CPD question

Personal Reflection:

Description of learning:

This article was about disease in Mesenteric Arteries and how to use ultrasound to evaluate the extent of the disease.

Benefits to my practice and service user:

Unfortunately it is not an area of scanning which is performed in our laboratory so it has no true benefits for my practice or service user apart from increasing my awareness of its presence.
