

REFLECTIVE CPD ACTIVITY FORM

Name: Lucy Watson

Job Role: Vascular Sonographer

Date and time: 16th - 17th April 2016, 9am - 5pm (total 16 hours)

Description:

Two day *Kick Start Ultrasound* course at the Australian School of Medical Imaging (ASMI) in Hornsby, Sydney.

Type of Activity:

Educational

Benefits to own practice

During this intensive 2 day course I experienced valuable one-on-one mentoring from a highly experienced sonographer. The training course increased my knowledge of abdominal ultrasound imaging including the aorto-iliac arteries, renal arteries, mesenteric arteries, hepatic veins and portal vein. These skills will be very useful in my vascular ultrasound work and will enable me to provide more information to the referring physician.

Benefits to service user

The referring physician will be provided with more relevant and detailed clinical information during the vascular ultrasound scan. The patient will have a more thorough investigation facilitating better clinical outcomes.

Supporting evidence

Certificate of attendance.
