

Renal Study Day

OPD 4

Seminar Room

On the 2nd of May 2018 Heather Griffiths attended the above study day; using a renal patient (volunteer) Heather used a Duplex mobile scanning device to demonstrate to staff how a scan of the patient's fistula is carried out.

Message Renal Study Day HG.docx (14 KB)

Hi Heather,

Many Thanks for helping out last week i was very grateful, i think it was interesting for staff to see how a scan is conducted. I would like to think we could do a repeat of this day sooner rather than later and it might be helpful for staff to also see pictures of scans with various issues that could be talked round i.e. a stenosed fistula. If you want me to re word any of the above i will happily do that for you.

Rona took the actual feedback sheets for both you and the surgeons but from memory i do think staff found the demonstration to be a good experience and this is an experience staff would otherwise not necessarily be exposed to.

Thank you again

Heather

Hi Heather,

I wondered if by reply to this email you could informally confirm that I presented a short scan at the renal study day 2nd May 2018. This is for CPD purposes. Also, any feedback regarding the presentation of the scan would be appreciated.

Congratulations again on the event.

Many thanks,

Heather

Heather

Thank you for all the time you spent organising and preparing for this, I know it used several hours of your personal time as well!!

Thank you to all who replied to Heather and made yourselves available to present, this was very much appreciated and as Heather said hopefully we can plan towards the end of the year and have more of a variety of speakers. Our staffing levels may have improved by then as some of our 8 ML girls should have returned by the end of the year, enabling more staff to attend.

Regards

Jacqueline
