Dear Mairéad,

Re: Vascular Studies Unit placement on Thursday 13th September, 2018

Thank you for coming over to spend a day in our unit to get some experience with duplex of the renal and mesenteric arteries with a specific focus on surveillance of complex fenestrated and branched EVAR devices.

We hope the sessions were useful for you and that you have been able to use it to enhance the service you offer to patients who have undergone fEVAR or bEVAR.

I have enclosed some useful documentation that we discussed on the day, which you may wish to use as a starting point for your own clinical protocols or guidelines. If there is anything else we can do for you, don't hesitate to drop us a line.

Best wishes,

Ved Ramnani
Head Clinical Vascular Scientist
