

REFLECTIVE CPD ACTIVITY FORM

Name: **Minta Sabrina Palmer**

Job Role: **Lead Vascular Technologist**

Name:	Scientist Training Programme Train the Trainer Webinar 1: Introducing the STP	
Date(s):	29/06/2022	Total Days/Hours: 2.5 Hours
Type of activity:	<input type="checkbox"/> Educational <input type="checkbox"/> Professional <input checked="" type="checkbox"/> Work-based <input type="checkbox"/> Self Directed <input type="checkbox"/> Other	
Description of Learning:	This was the first of 3 STP Train the Trainer Webinars held by The National School of Healthcare Science. The purpose of this Webinar was to introduce the STP Training Manager and Program Directors, and to introduce the STP, as well as outline the programme curriculum and structure.	
Analysis:	An overview of the STP programme was provided, highlighting the new curriculum for 2022. Each year of placement was outlined, with the required modules discussed. The Training Officer responsibilities were discussed, as were the expectations and responsibilities of the trainees. The STP Training Plan was discussed.	
Conclusion:	It was very helpful to understand that the Training Plan, while having to be detailed and comprehensively planned, is still fluid enough to allow for flexibility with scheduling and rearranging tasks/goals. It was helpful to realise that others shared the same concerns and questions regarding training procedures and responsibilities. This Webinar has helped to outline exactly which duties and responsibilities are for my undertaking, and which are for the trainee to pursue.	
Benefits to your practice:	We have recently been granted STP training accreditation, so this Webinar was an important part of preparing us for what to expect when we receive our first trainee. Understanding the duties and responsibilities of all parties will ensure that modules are completed on time, and will ensure that all paperwork and assignments are up to date.	

Benefits to service user:	Successful training of an STP trainee benefits our trust and our patients by providing a more robust vascular service, as well as helping to increase the number of qualified vascular sonographers in our region.
Supporting evidence:	Certificate of Participation
