Hello Tim,

I am currently writing up the SVT conference for the newsletter. I've taken a few notes from your presentation (which I found really interesting being a previous AAA screener) but I wanted to confirm that what I have taken is correct before I put it in the newsletter.

"New plans for next year involve the possibility of looking into a rescan at 70 years for those who fall in the 2.5 - 2.9 cm category, scanning female smokers and increasing surveillance timings to 6 monthly and 2 yearly."

Kind Regards,

Kate Houghton
