About

What is the SVT?

Newsletter

SVT Newsletter is now available to view online

Research

The SVT Research committee provides information and support to SVT members taking part in or setting up research projects.

The remit of the Research Committee is as follows:

- Provide guidance relating to matters of research directly to the SVT Executive Committee.
- Actively support SVT members (AVS and trainee) in participating and leading vascular disease related research that is of high quality, uses appropriate methods and is likely to produce good results
- Support members in the proposals and application for large grants/fellowships
- Provide research advice and guidance for members via the SVT website and newsletter
- Improve and maintain the SVT research grant program; review grant applications and provide funding recommendations to the SVT Executive committee
- Develop and facilitate research collaborations with external bodies (e.g. Vascular Society, Vascular and Endovascular Research Network etc.) on behalf of the SVT membership
- In collaboration with key stakeholders, we aim to develop consensus on research priorities

NIHR Non-commercial Partner

In recognition of our robust application and peer review process for SVT Research/Innovation grants we have become an NIHR non-commercial partner. These are because the SVT:

- Award research funds as a result of open competition across England with high quality peer review
- Fund research that is of clear value to the NHS
- Take appropriate account of the priorities, needs and realities of the NHS in making decisions about the research that they fund.

This gives access to the NIHR CRN NHS infrastructure, training and study support service. <https://www.nihr.ac.uk/funding-and-support/study-support-service/information-for-research-funders.htm>

Committee members

Richard Simpson - Chair

Mari Murumets, Nida Nadeem, Steve Rogers, Laura Scott and Yvonne Sensier.
