Paper: Autumn 2017 CPD Questions

Personal Reflection:

Description of learning: EVAR surveillance using standard, contrast and 3d ultrasound

Evaluation - 2 interesting papers, the first looking at cost savings in using an ultrasound based EVAR surveillance, the second looking at contrast and 3d

Analysis -paper 1 is essentially what we do now so good to have confirmation about our surveillance approach. Paper 2 is a pilot study and indicates the way we should be looking to progress. Currently don't do contrast scans

ACTION PLAN - could build a business case in to transfer Evar surveillance from CT to contrast based ultrasound . this would need to be done with Pete Cantin - potentially savings could go towards new VS
