Paper: Autumn 2017 CPD Questions

Personal Reflection:

Interesting comparison between CTA and ultrasound. Clearly U/S has advantages in cost and with CEUS can be more accurate in certain situations. CTA disadvantages - radiation, neurotoxicity - significant in comparison. Experience and expertise of operator very important. My lab not involved in eva surveillance but personal action plan to investigate potential at RDE for adding this to our modalities and investigate 3D scanners and potential uses in the vast lab.
