

Nicola Sutcliffe has completed this personal reflection on **30/08/2018**

Paper: Summer 2018 CPD question

Personal Reflection:

CPD questions based on 2 Research papers on Endovascular treatment of atherosclerotic stenosis or occlusions of the Coeliac and SMA in patients with mesenteric ischaemia and Mesenteric stenosis, collaterals and compensatory blood flow.

This was an interesting as it is a field I have no experience in. I found it useful to read about and now understand a little more about the topic.

I intend to re-read the papers to absorb the knowledge more.
