Anne Wilcox has completed this personal reflection on **08/04/2020**

Paper: Winter CPD Questions 2020

Personal Reflection:

Comparison between duplex ultrasound and multi gate Quality Doppler Profile Software in the Assessment of lower limb perforating vein direction.

Paper concludes that the traditional definition of PV incompetence is questioned by the data and further investigations are required to identify a gold standard assessment.

At the moment we will not be changing our assessment techniques for PV incompetence.

Reappraisal of the utility of the Tilt - table in the investigation of venous disease.

Paper concludes that manoeuvres using APG on a tilt table have the potential to quantify the contributions of global obstruction and reflux in patients with venous disease.

Interesting paper- however we do not have a tilt table - we cannot change our present assessment of venous disease
