Paper: Winter 2023/24 CPD questions

Personal Reflection:

self assessment for Winter 23/24 CPD questions - articles on soft tissue vascular anomalies and arterialisation of the deep veins to prevent limb amputation.

These were 2 really interesting articles about areas I do not see in my day to day practice.

It was helpful to know that arterialisation is possible and successful.

It was useful to also learn about vascular malformations and tumours which we rarely see
