

Gillian McKillop has completed this personal reflection on **17/11/2017**

Paper: Autumn 2017 CPD Questions

Personal Reflection:

Very informative as I do not scan EVAR patients.

I learnt how the scans are done and what the vascular scientist is looking for. Also learnt that CDUS is cheaper, safer and equally efficient and accurate, when compared to CT scanning in post op follow up.

In the second paper I learnt all about contrast enhanced 3D ultrasound as again that is something I don't do in my job. It is more sensitive to endoleak following EVAR than both 2D ultrasound and CTA.
