Paper: Autumn 2018 CPD questions

Personal Reflection:

I found the paper on Spiral Laminar Flow extremely interesting and will look for this in my daily practice.

I do not regularly scan fistulas at present, but this maybe a development that the department will take on in the future as we do have a Renal Dialysis Unit within the hospital.

I have occasionally been asked to scan a fistula, when a stenosis has been suspected and reading the article refreshed my limited knowledge.
