

**Nicola Sutcliffe** has completed this personal reflection on **20/04/2020**

**Paper:** Winter CPD Questions 2020

**Personal Reflection:**

CPD points exercise. Looking at 2 papers and answering questions - Comparison between duplex ultrasound and multigate Quality Doppler profile software in the assessment of lower limb perforating vein direction.

Reappraisal of the utility of the tilt table in the investigation of venous disease.

This was interesting as it made me rethink what I understand about venous perforators and how I scan them. I will look at the reflux duration in more detail now rather than just the colour flow. I found the tilt table paper interesting also and enjoyed finding the answers,
