Modern Management of Varicose Veins for Nurses

**Clumber Park Hotel,
Blyth Road,
Nottingham S80 3PA**

9.30am, Wednesday
5th November 2014

This course is most suitable for:

- District Nurses
- Practice Nurses
- Tissue Viability Nurses

Varicose Veins affects up to 3% of the population at some time in their life. Its management not only involves the Vascular Surgeons but also the hospital, practice and community nurses.

This meeting will provide you with detailed understanding about the anatomy, physiology investigation and modern treatment of Varicose Veins. In addition there will be hands on workshops on 4 layer compression bandaging and compression hosiery, ultrasound scanning and involvement of nurses in varicose vein treatment.

Please contact **Hazel Fletcher**
by email hazel.fletcher@sfh-tr.nhs.uk
to reserve your place.

Refreshments will be provided.
