Please comment on the applicant's ability to write clear reports and relay urgent findings appropriately:

Emily is an excellent sonographer, who not only produces a clear and accurate scan report but also appreciates clinical applications, which is very useful indeed. For example she appreciates the application of endovenous treatment options and will comment of the position and tortuosity of the vein which is very helpful in making such decisions. Emily will also relay urgent findings for example the unexpected finding of a large aneurysm.

Please include any other comments you may have (please continue on the reverse of the page if required).

Of those patients who have gone on to have Vascular surgery, I can say that Emily's scans have proved to be very accurate and useful.
