Post Right CEA

Right:

CEA. Patch was identified.

Patent proximal ICA with patch.

There is a tight stenosis (>80%) at the distal end of the patch with focal fibrous tissue development. Patent distal ICA.

PSVR 6.5

St Mary's ratio 29

Left:

Irregular calcified atheromatous plaques across ICA which produce approximately 50% stenosis (unchanged)

Patent distal ICA

Antegrade flow in vertebral arteries.

Scan performed and reported by: Ikhlq Rana
