LOWER LIMB COLOUR DUPLEX VENOUS ASSESSMENT

Left:
 LSV is incompetent from SFJ in its entirety, diameter 11.9mm to 4.4mm. Below knee gives rise to an incompetent varicose vein anteriorly diameter 6.9mm to 4.2mm and joined by another varicose vein posteriorly arising from a perforator on back of knee. There is another varicose vein in back of upper calf arising from a perforator medially and ends in a perforator laterally (diameter 8.1mm to 3.5mm). SSV is competent. Deep veins are competent

Scan performed and reported by: Ikhlaz Rana
