LEFT LOWER LIMB COLOUR DUPLEX VENOUS ASSESSMENT		

Left Leg;

H/O LSV stripping. 1-Two tortuous veins arising from SFJ, join at mid thigh to make single in competent varicose vein, goes down and then swings around over the patella to reach medial aspect of upper calf, again swings laterally and then medially to reach front of medial malleolus. It drains in medial and lateral mid calf perforators. (diameter 3.3mm to 7.7mm)

2- An incompetent varicose vein arises from medial below knee perforator diameter 4.1mm, goes down ward to reach front of medial malleolus.
SSV and deep veins are patent and competent.

Scan performed and reported by: Ikhlaz Rana
