LOWER LIMB COLOUR DUPLEX VENOUS ASSESSMENT

Right Leg varicose veins;

LSV is incompetent from SFJ in its entirety (Diameter 5.2-17.6mm). It is rather straight. An incompetent and tortuous vein arises from LSV below knee (diameter 8.8mm), swings posteriorly to end in an incompetent perforator behind lateral malleolus.

SSV and deep veins are patent and competent.

Scan performed and reported by: Ikhlaz Rana
