LOWER LIMB COLOUR DUPLEX VENOUS ASSESSMENT

Right;

LSV, SSV and deep vein are patent and competent.

An incompetent varicose vein arises from back of upper thigh (diameter 4.7mm to 6.1mm), goes down behind lateral knee then swings forwards to lateral aspect of calf and then backward and down to reach behind lateral malleolus. It drains in a perforator at mid calf and lateral malleolus.

Left.

LSV, SSV and Deep veins are patent and competent.

- 1- A varicose vein arises from LSV at mid thigh and joins it again at knee level, mildly incompetent diameter 3.4mm
- 2- A incompetent varicose vein diameter (3.4mm to 8.1mm) arises from upper popliteal fossa, joins SSV and goes lateral aspect of calf to drain in a perforator, rest of SSV is competent
