Below the knee	No		No	

Notes

BILATERAL LOWER LIMB VENOUS DUPLEX ASSESSMENT:

*Challenging scan due to lymphoedema and patient difficulty standing.

Iliac veins not viewed. Flow in the common femoral vein is phasic with respiration and responds normally to a Valsalva manoeuvre, suggesting proximal vein patency. All visualised deep veins appear patent and competent with no evidence of previous DVT, bilaterally.

All measurements are proximal to the medial malleolus unless otherwise stated.

RIGHT:

Sapheno-femoral junction (SFJ) is competent. Long Saphenous vein (LSV) is competent along its length

Assessed by Sharifa Kiyegga

Printed on 12/12/2019 at 9:33 am

Checked by

Short Saphenous vein (SSV) is competent and is continuous with a competent vein of Giacomini.

Sapheno-popliteal junction (SPJ), which is high, is patent and competent.

LEFT:

Sapheno-femoral junction (SFJ) is competent. Long Saphenous vein (LSV) is competent along its length.

Sapheno-popliteal junction (SPJ) was not identified.

Short Saphenous vein (SSV) is competent and is continuous with a competent vein of Giacomini.
