

Vascular lab report

Assessed by: Suleman Choudhury

Anterior view

Posterior view

Right GSV thigh - 3.8mm
Right GSV calf - 2.7mm

red colour denotes reflux Competent superficial vein Competent deep vein Deep vein scarring

US Doppler lower limb veins Rt:

The Sapheno-Femoral Junction (SFJ) and thigh Greater Saphenous vein (GSV) are patent and competent. There is an incompetent perforator in the medial proximal calf which fills a varicose vein (3.8mm) coursing to the foot and refluxes into the calf GSV

There is also a lateral varicose vein which appears to originate from the ?buttock/pudendal source – difficult to trace.

The Sapheno-Popliteal Junction (SPJ) and Short Saphenous vein (SSV) are patent and competent.

All deep veins are all patent and competent.
