Consultant:

V5

DUPLEX ASSESSMENT LOWER LIMB VENOUS

Scan Date: 06.07.2021

Conclusion:

LEFT LEG

1. FV incompetent (3.1s).
2. POPV paired. One POPV patent and competent, second POPV incompetent (2.6s) with evidence of old thrombus.
3. Sapheno-femoral reflux. Evidence of minor mural thrombus detected in LSV at knee and mid calf level. Incompetent accessory LSV/VV arises from LSV at mid calf. Incompetent perforator vein communicates with LSV 20cm above ankle level. LSV calibre 5.5mm at groin, 4.0mm at mid thigh, 4.1mm at knee and 3.6mm BK.
4. Lateral calf VV detected, ? origin.
5. CFV, PTVs, ATVs and SSV patent and competent.
