

30/07/2021, 13:55, UA Carotid and Vertebral

Duplex scanning demonstrated an occluded right internal carotid artery and calcified plaque in the left internal carotid artery causing moderate disease. Vertebral and subclavian artery velocities were within the normal range bilaterally.

Conclusion:

1. (R) ICA occluded.
2. Moderate (L) ICA disease, 16-49% (nearer 40%).
