

21/07/2021, 14:08, UA Carotid and Vertebral

Duplex scanning demonstrated minor mixed echo plaque in the origin of the right internal carotid artery and there was minor intimal thickening on the left. Vertebral and subclavian artery velocity waveforms were within the normal range bilaterally.

Conclusion:

1. Minor (R) ICA disease, 16-49% (nearer 20%).
2. Minor (L) ICA disease, 1-15%.
