Right lower limb:

The deep venous system is patent and competent from CFV-distal SFV. The proximal POPV is patent but **incompetent** at the level of an incompetent gastrocnemius vein. The distal POPV is patent and competent.

The SFJ is competent. The LSV is competent throughout the thigh and proximal calf. Unable to assess the mid-distal calf LSV due to compression bandaging.

The SPJ was not identified. Competent posterior thigh vein. The proximal calf SSV is competent. Unable to assess the mid-distal calf SSV due to compression bandaging.

No obvious incompetent perforators noted.
