The deep venous system is patent and competent from CFV-POPV.

The SFJ is competent. The LSV is competent throughout its length. There is an accessory LSV which tracks medial to the main LSV trunk. This is competent throughout, but gives rise to a small incompetent branch in the proximal calf which tracks over the medial and anterior calf.

The SPJ was not identified. Competent posterior thigh vein. The SSV is competent throughout its length.

No obvious incompetent perforators noted.

Large bakers cyst noted.
