The deep venous system is patent and competent from CFV-POPV.

The SFJ is competent. The LSV is competent throughout the thigh and proximal-mid calf. The distal calf LSV is of small calibre but **incompetent**. There are multiple small tortuous veins arising from the LSV in the mid calf, these track down the medial calf but appear to be **competent**.

The SPJ was not identified. Competent posterior thigh vein. The SSV is competent throughout its length.
