

VENOUS LEG DUPLEX REPORT : 25/05/2023

TO :

RE :

Tested By : MR JASON MAPANO

Test Date : 25/05/2023

Requested Date : 18/04/2023

Right	Left
Indication : Not Scanned	Primary VV's
SFJ :	Incompetent
LSV :	Not Visualised
ALTB :	Incompetent
SPJ :	Competent
SSV :	Competent
CFV :	Competent
SFV :	Competent
POP :	Competent
Perforator :	Incompetent

Comments : Left LL C¹ disease, varicose vein with symptoms, Prev CABG-GSV harvest done that time, now with multiple huge bunches of varicosities in thigh. To look and superficial and deep venous competencies and junction status.

Left venous duplex scan LE

SFJ is incompetent.

ALTB is patent but incompetent.

ALTB divides medial and lateral aspect of the thigh which is linear until the mid thigh then became tortuous distally.

Non-visualization of the GSV due to history of vein harvest.

SSV is patent and sclerotic but competent.

SPJ is competent.

CFV, FV and POP shows patent and competent.

Competent perforator in the mid thigh.

Mild reflux in the mid calf perforator (0.5 sec).

Note:

ALTB is suitable for EVLT + phlebectomy.
