PERIPHERAL ARTERIAL DUPLEX REPORT : 25/05/2023

TO :

RE :

Tested By : MR JASON MAPANO

Test Date : 25/05/2023

Requested Date : 25/05/2023

Indication : Other

**PSV1 max
(cm/sec)**

Common Femoral R : 350

Common Femoral L : 114

Comments : Has left ICA stenosis- may require a CEA stent. Please scan femoral arteries to check has triphasic pulses.

Arterial duplex scan LE (CFA only).

Right CFA shows moderate plaque with increase in PSV >300 cm/sec (>50% stenosis) with triphasic waveform.

Left CFA shows mild plaque with normal PSV and with triphasic waveform.
