PERIPHERAL ARTERIAL DUPLEX REPORT : 09/06/2023

TO :

RE :

Tested By : MR JASON MAPANO

Test Date : 09/06/2023

Requested Date : 09/06/2023

Indication : Ulcer

PSV1 max
(cm/sec)

Common Femoral L : 86
Popliteal L : 41
Crural L : 21

Comments : Left gangrene on the tip of the big toe.

Left ABI: 70/100: 0.7 (borderline).

Left arterial duplex scan LE

Short occlusion (total occlusion) in the distal segment of the SFA.

Distal to the occlusion shows low PSV and monophasic waveform until the trifurcation vessels and DPA.

CFA, PFA and proximal segment of the SFA are patent with normal PSV and biphasic waveform.
