**PERIPHERAL ARTERIAL DUPLEX REPORT : 26/06/2023**

TO :

RE :

Tested By : MR JASON MAPANO

Test Date : 26/06/2023

Requested Date : 26/06/2023

Indication : Post PTA

PSV1 max  
(cm/sec)

Common Femoral L : 72

Crural L : 6

Comments : Post angioplasty on the left leg.

Left ABI not detected.  
Left TBI shows erratic.

Left arterial duplex scan LE  
Total occlusion of the proximal to distal SFA and POP arteries.  
Posterior tibial artery shows low PSV (thump signal).  
CFA and PFA are patent with normal PSV and triphasic waveform.

Note:

The left GSV is patent and linear with widest diameter of >3mm from the groin down to the ankle segment suitable for conduit.
