PERIPHERAL ARTERIAL DUPLEX REPORT : 29/06/2023

TO :

RE :

Tested By : MR JASON MAPANO
Test Date : 29/06/2023
Requested Date : 14/06/2023
Indication : IC

PSV1 max
(cm/sec)

Common Femoral R :	162
Common Femoral L :	157
Popliteal R :	26
Popliteal L :	41
Crural R :	36
Crural L :	44

Comments : Bilateral IC - interfering with his ability to care for his wife. ABPI 0.7 bilateral ?
evidence pliable disease in SFAS. Has some right knee pain which is probably
musculoskeletal.

Arterial duplex scan LE

Short segment occlusion in the bilateral distal SFA with reconstitution of flow in the bilateral
proximal popliteal arteries with low PSV and monophasic waveform until the trifurcation
vessels.

The bilateral CFA, PFA and proximal segment of the SFA are patent with normal PSV and
triphasic waveform.
