

PERIPHERAL ARTERIAL DUPLEX REPORT : 07/07/2023

TO :

RE :

Tested By : MR JASON MAPANO

Test Date : 07/07/2023

Requested Date : 07/07/2023 Indication
: IC

	PSV1 max (cm/sec)	PSV2 normal (cm/sec)	PSV1/PSV2 ratio
--	----------------------	----------------------------	--------------------

Common Femoral L :	122		
Super Femoral L :	416	89	4.67

Popliteal L :	28		
---------------	----	--	--

Comments : Left leg pain and cold digits of the foot.

Right ABI: 130/140: 0.92 (normal).

Left ABI: 70/140: 0.5 (reduced).

Left arterial duplex scan

Increase PSV >400 cm/sec (>70% stenosis) in the distal SFA and PFA.

Increase PSV >200 cm/sec (>50% stenosis) in the SFA origin and mid SFA.

POP A shows low PSV and monophasic until the trifurcation vessels and DPA.

CFA is patent with normal PSV with high monophasic waveform.
