

## Clinical Details

Left leg recurrent varicose veins.

## Report

**150525023 09/06/2023 US Doppler lower limb veins Lt**

Left:

There is an incompetent 7cm segment of proximal Long Saphenous Vein diameter 6.8mm and another segment at knee level, connected by recurrent veins at mid thigh. There are obvious superficial varicosities which communicate with proximal LSV and SFJ. These varicose veins drain through a varicose vein to lateral thigh and anterior calf.

Competent Short Saphenous Vein.

Patent and competent deep system.

There is an incompetent perforator 5cm above medial malleolus

No difference from previous scan
