Notes

RIGHT LOWER LIMB VENOUS DUPLEX ASSESSMENT

Iliac veins not viewed. Flow in the common femoral vein is phasic with respiration and demonstrates a normal response on Valsalva manoeuvre, suggesting proximal vein patency. All visualised deep veins appear widely patent with no evidence of previous DVT. The CFV appears incompetent. All other deep veins appear competent.

SFJ is patent and incompetent.

LSV is patent and incompetent in the proximal and mid thigh.

Incompetent branch noted at ~61cm from MM.

LSV is patent and competent in the distal thigh.

LSV is patent and competent in the distal calf.

LSV measures:

Thigh - 0.73, 0.67, 0.48cm
