

Vascular Studies Department Training Contract - Scientific Training Programme (STP) -

The Vascular Studies Department will ensure that we:

- Keep the patient at the focus of training
- Facilitate the training of the trainee
- Support the facilitation of work based academic assignments, including clinical and research activities
- Support the trainee's relationship & commitments to NSHCS and Manchester/HEI
- Provide appropriate supervision for the trainee and trainer(s)
- Meet regularly and monitor the progress of the trainee
- Mentor and support the trainee
- Provide an environment conducive to learning and one which upholds the Royal Free London Values of clearly communicating, visibly reassuring, actively respectful and positively welcoming for all service users and colleagues
- Act on feedback and areas of improvement highlighted by the trainee

I, the Trainee, will ensure that I:

- Keep the patient at the centre of my training and work
- Uphold a professional and compassionate attitude, which upholds the values of Royal Free London (clearly communicating, visibly reassuring, actively respectful and positively welcoming) for all service users and colleagues
- Familiarise myself and keep up to date with local protocols, national guidelines and professional documentation, such as the Good Scientific Practice (GSP)
- Am self-motivated, self-directed and proactive in my learning
- Ask for support and help when needed
- Clearly communicate with the Vascular Studies team and proactively engage in 1:1s, appraisals and multisource feedbacks
- Keep up to date with academic studies, deadlines and OneFile
- Read and familiarise self with provided '*Roles and Responsibilities*' document

I confirm I have read and understood the above responsibilities:
